

DECLARATION

The 21st century is marked by a resurgence of armed conflicts, wars, exploitation of the subsoil of southern countries (kept in the colonial spiral).

This promotes fascism, exclusion, the restriction of fundamental rights stemming from the Declaration of Human Rights! Withdrawal of identity!

The consequence is the systematic questioning of freedom of expression, social rights and labour rights!

This backward step blurs the cards of international analysis to produce a doctrine, a unique thought, aligning itself with the most warlike part of a West manipulated by NATO that has never redistributed so much wealth to the 1% of the richest!

Capitalism in crisis calls for war to prosper against social progress and peoples. It arms and finances dictators and reactionary, authoritarian regimes (as in the 1970s) under the guise of defending democracy.

Based on this international context, any vision of peace is silenced by brandishing the GDP, petrodollars and industrial profits of the arms race.

Fascists acquire a predefined enemy that are foreigners, others. Extreme right-wing ideas fuel hatred, nationalism and the dehumanization of our societies!

The World is even more fragmented and divided.

World Peace is the only guarantee for social progress. Every people has the right to live in dignity on their land. Every people has the right to self-determination.

The EDC reiterates its solidarity with all the peoples who suffer, who undergo oppression, who see their basic rights violated.

We demonstrate international workers' solidarity for World Peace, accompanied by social progress for all workers.

For all these reasons, we, Dockers and Port Workers affiliated to the EDC, are determined to act for Peace.

For this, we have decided that actions will be organized in all EDC ports on November 30th, 2023, between 11:00 and 14:00 Paris time.

For the union of Dockers and Port Workers from all countries!
